Tamil Nadu, India

QUALIFICATIONS

K.S.R. College of Engineering

B.Tech, Information Technology
Autonomous | Current | 8.38 CGPA

Relaince Matric Higher Secondary School

HSC +2
State Board | 2024 | 84.67%

Relaince Matric Higher Secondary School

SSLC
State Board | 2022 | 91.2%

TECHNICAL SKILLS

Languages

Java, Python, C, JavaScript

Frontend

HTML, CSS, React.js

CS Fundamentals

DSA, OOPS, DBMS, Operating Systems,
Computer Networks, JDBC

Databases

MySQL, MongoDB

Developer Tools

Git, GitHub, Postman, Antigravity, Figma,
VS Code, Canva

Known Libraries

TensorFlow, OpenCV, Matplotlib, Pandas,
Scikit-learn, Numpy

Machine learning

Machine Learning algorithms, Deep
Learning (CNN), Generative AI

CERTIFICATIONS

- Presented paper at IEEE Conference, University of Hyderabad.
- TCS iON Career Edge – Young Professional program by Tata Consultancy Services.
- Silver Certificate – Wadhwani Foundation | Ignite Bootcamp Full.

PROFESSIONAL SUMMARY

Enthusiastic Information Technology student with skills in Python, Java, SQL, and Machine Learning. Experienced in building software and ML projects, with hands-on exposure through a Generative AI internship. Passionate about problem-solving, continuous learning, and seeking opportunities as a Software Developer or Machine Learning Engineer.

INTERNSHIPS

Generative AI Intern | Gateway Software Solutions

Completed a 15-day internship covering fundamentals of Generative AI, Large Language Models (LLMs), and prompt engineering. Gained hands-on exposure to Python-based AI workflows and practical applications of Generative AI in solving real-world problems.

AI & Machine Learning Intern | Litz Tech

Completed a 15-day internship gaining practical knowledge of AI and ML algorithms and Deep Learning concepts. Worked on a deep learning project applying data preprocessing, model development, training, and evaluation using Python.

PROJECTS

1. Hospital Management System | Web-Based Healthcare Platform

Tech Stack: Java + JDBC + MySQL + HTML + CSS + JavaScript

- Developed a web-based Hospital Management System with separate Admin, Doctor, and Patient dashboards, making it easier to manage hospital activities in one place.
- Added key features such as patient registration, doctor management, appointment booking, medical records, prescriptions, billing, and doctor availability to simplify day-to-day hospital operations.
- Implemented email verification and notifications to keep patients informed about their appointments, prescriptions, and billing details.

2. AI-Based Potato Leaf Disease Prediction

Tech Stack: HTML + CSS + JavaScript + Python + TensorFlow + Postman + GCP

- Trained a CNN-based disease classification model on 15,000+ images across three classes, achieving 97% accuracy via data augmentation.
- Deployed the model on GCP and validated inference performance through API testing using Postman.

ACHIEVEMENTS

Java Teaching Bootcamp | KSR Polytechnic College

Conducted a hands-on Java programming bootcamp for polytechnic students, covering core Java concepts and practical coding sessions to strengthen their programming fundamentals.

SOFT SKILLS

Analytical Thinking | Problem-Solving | Communication | Quick Learner | Leadership
